Index to the NLGI Spokesman, Volume 56 April, 1992 — March, 1993

Index by Authors

Beret, S., and Trabert, G. R., Grease Pumpability —Status Report, January 1993 (10)

Bhatia, J., Sovani, D. R., and Dhawan, R. L., Tailor-made Fats and Fatty Acids Based on Castor Oil for Processing of High Performance Greases, October 1992 (7)

Brannen, W. T. and Lee, D. A., Thermal Stability Testing of Industrial Gear Oils, April 1992 (1)

Burkhalter, R. L., Criteria for Modern Grease Operations, June 1992 (3)

Cann, P. M. and Spikes, H. A., Film Thickness Measurements of Lubricating Greases Under Normally Starved Conditions, May 1992 (2)

Fennema, Roger L., Technology & Lubricants, The 1993 Domestic Automobiles, January 1993 (10)

Graham, S. Diane, Masters, K. R., and Scott, W. P., Grease Manufacturing Methods, December 1992 (9)

Hatakeyama, Ko, Lubricating Grease for a Plunging Type Constant Velocity Joint, September 1992 (6)

Hildebrant, K. A. and Slack, D. A., Development of a New Wire Rope Dressing, July 1992 (4)

Ischuk, Yury L., and Kravchenko, A. R., Dinacorrotest -- The Quantitative Rapid Method to Evaluate Protective Properties of Greases Under Dynamic Conditions, December 1992 (9)

Jacobs, Norman L. and Stringfellow, William D., New Standards Required for Environmental Thread Compounds, July 1992 (4)

Kenan, Wilfred M., Characteristics of Graphite Lubricants, February 1993 (11)

Komiya, Hiroshi, Effect of Contaminant in Lubricant on Noise of Ball Bearings, August 1992 (5)

Kroll, Ronald, The Planning, Design and Construction of a Specialty Lubricants Plant, March 1993 (12)

Kumar, Sudhir, McDuff, P. J., Witte, A. C., and McInerney, D. G., Development of a Laboratory Test for Rail Lubricants, September 1992 (6)

Lakes, Stephen, Synthetic Gear and Transmission Lubricants, July 1992 (4)

McCusker, Susan A., Lubricate for Bearing Life, April 1992 (1)

Mekitarian, A. E., and Keller, Jr., J. A., Product Safety and Modern Grease Formulations, August 1992 (5)

Murphy, W. R., Nipe, R. N., Jackson, A., Kamenick, R. J., and Boodle, B. J., High-Viscosity Synthetic Gear Oil Development, June 1992 (3)

Newsoroff, G. P., and Harris, J. W., Manufacture and Properties of Microgel® Thickened Greases, August 1992 (5)

Okamura, Seiji, and Toyota, Masao, Long Life Urea Grease for High Temperature and High Speed Application, June 1992 (3)

Peraza, Susana Forsythe and Paez-Leon, Cristobal J., Development of a Lubricant Contact Aid Compound (LCAC) as an Answer to the Dynamic (fretting effect) and Static (oxide) Behavior of Electric Contact Surfaces (Based on a five-year infrared thermographic study), May 1992 (2)

Plint, M. A. and Allison-Griener, A. F., A New Grease Viscometer: A Study of the Influence of Shear on the Properties of Grease, May 1992 (2)

Samman, Nicolas, Chemistry of Aluminum Complex Grease Revisited, November 1992 (8)

Stakhursky, Alexander D., Yurtin, Leonid O., Ischuk, Yury L., Cherednichenko, Georgy I., Froishteter, Georgy B., Lendjel, Iosif V., and Manojlo, Alexander M., Installation for Continuous Grease Production at the Berdjansk Petro-Oil Plant, March 1993 (12)

Trabert, George R., Review of 1991 NLGI Worldwide Production Survey, February 1993 (11)

Wunsch, Fritz, Noise Characteristics of Lubricating Greases Used for Anti-Friction Bearings, April 1992 (1)

Index by Article Title

Characteristics of Graphite Lubricants, Kenan, Wilfred M., February 1993 (11)

Criteria for Modern Grease Operations, Burkhalter, R. L., June 1992 (3)

Chemistry of Aluminum Complex Grease Revisited, Samman, Nicolas, November 1992 (8)

Development of a Laboratory Test for Rail Lubricants, Kumar, Sudhir, McDuff, P. J., Witte, A. C., and D. G. McInerney, September 1992 (6)

Development of a Lubricant Contact Aid

Compound (LCAC) as an Answer to the Dynamic (fretting effect) and Static (oxide) Behavior of Electric Contact Surfaces based on a five-year infra-red thermographic study, Peraza, Susana Forsythe and Paez-Leon, Cristobal J., May 1992 (2)

Development of a New Wire Rope Dressing, Hildebrant, K. A. and Slack, D. A., July 1992 (4)

Dinacorrotest -- The Quantitative Rapid Method to Evaluate Protective Properties of Greases Under Dynamic Conditions, Ischuk, Yury L., Kravchenko, A. R., December 1992 (9)

Effect of Contaminant in Lubricant on Noise of Ball Bearings, Komiya, Hiroshi, August 1992 (5)

Film Thickness Measurements of Lubricating Greases Under Normally Starved Conditions, Cann, P. M. and Spikes, H. A., May 1992 (2)

Grease Manufacturing Methods, Graham, S. Diane, Masters, K. R., Scott, W. P., December 1992 (9)

Grease Pumpability — Status Report, Beret, S., and Trabert, G. R., January 1993 (10)

High-Viscosity Synthetic Gear Oil Development, Murphy, W. R., Nipe, R. N., Jackson, A., Kamenick, R. J., and Boodle, B. J., June 1992 (3)

Installation for Continuous Grease Production at the Berdjansk Petro-Oil Plant, Stakhursky, Alexander D., Yurtin, Leonid O., Ischuk, Yury L., Cherednichenko, Georgy I., Froishteter, Georgy B., Lendjel, Iosif V., and Manojlo, Alexander M., March 1993 (12)

Long Life Urea Grease for High Temperature and High Speed Application, Okamura, Seiji, and Toyota, Masao, June 1992 (3)

Lubricate for Bearing Life, McCusker, Susan A., April 1992 (1)

Lubricating Grease for a Plunging Type Constant Velocity Joint, Hatakeyama, Ko, September 1992 (6)

Manufacture and Properties of Microgel® Thickened Greases, Newsoroff, G. P., and Harris, J. W., August 1992 (5)

New Grease Viscometer: A Study of the Influence of Shear on the Properties of Grease, A, Plint, M. A. and Allison-Griener, A. F., May 1992 (2)

New Standards Required for Environmental Thread Compounds, Jacobs, Norman L. and Stringfellow, William D., July 1992 (4)

Noise Characteristics of Lubricating Greases Used for Anti-Friction Bearings, Wunsch, Fritz, April 1992 (1)

Planning, Design and Construction of a Specialty Lubricants Plant, The, Kroll, Ronald, March 1993 (12)

Product Safety and Modern Grease Formulations, Mekitarian, A. E., and Keller, Jr., J. A., August 1992 (5)

Review of 1991 NLGI Worldwide Production Survey, Trabert, George R., February 1993 (11)

Synthetic Gear and Transmission Lubricants, Lakes, Stephen, July 1992 (4)

Tailor-made Fats and Fatty Acids Based on Castor Oil for Processing of High Performance Greases, Bhatia, J., Sovani, D. R., and Dhawan, R. L., October 1992 (7)

Technology & Lubricants, The 1993 Domestic Automobiles, Fennema, Roger L., January 1993 (10)

Thermal Stability Testing of Industrial Gear Oils, Brannen, W. T. and Lee, D. A., April 1992 (1)

Index by Category

General

Chemistry of Aluminum Complex Grease Revisited, Samman, Nicolas, November 1992 (8)

Grease Pumpability -- Status Report, Beret, S., and Trabert, G. R., January 1993 (10)

Marketing

Criteria for Modern Grease Operations, Burkhalter, R. L., June 1992 (3)

Review of 1991 NLGI Worldwide Production Survey, Trabert, George R., February 1993 (11)

Product Development

Development of a New Wire Rope Dressing, Hildebrant, K. A. and Slack, D. A., July 1992 (4)

Development of a Lubricant Contact Aid Compound (LCAC) as an Answer to the Dynamic (fretting effect) and Static (oxide) Behavior of Electric Contact Surfaces based on a five-year infra-red thermographic study, Peraza, Susana Forsythe and Paez-Leon, Cristobal J., May 1992 (2)

Long Life Urea Grease for High Temperature and High Speed Application, Okamura, Seiji, and Toyota, Masao, June 1992 (3)

Lubricating Grease for a Plunging Type Constant Velocity Joint, Hatakeyama, Ko, September 1992 (6)

Additives

Characteristics of Graphite Lubricants, Kenan, Wilfred M., February 1993 (11)

Manufacture and Properties of Microgel® Thickened Greases, Newsoroff, G. P., and Harris, J. W., August 1992 (5)

Bearings

Effect of Contaminant in Lubricant on Noise of Ball Bearings, Komiya, Hiroshi, August 1992 (5)

Lubricate for Bearing Life, McCusker, Susan A., April 1992 (1)

Noise Characteristics of Lubricating Greases Used for Anti-Friction Bearings, Wunsch, Fritz, April 1992 (1)
